

ReThink Sustainability Index

ReThink Sustainability acknowledges the United Nations 'Global Goals', the 17 Sustainable Development Goals, as the accepted international framework for delivering a more sustainable world. ReThink Sustainability has utilised the Sustainable Development Goals to create a tool that will measure an organisation's sustainability performance.

Whether it's a focus set of sustainability goals, or the full spectrum, we've created the ability to measure what until now has been, largely immeasurable. We believe sustainability begins with having the right knowledge, insights, mindset - that's what we measure. This leads to performance and better outcomes for organisations and for the planet, increased awareness and adoption of sustainability best practices in your organisation and insights from your people and their alignment to your sustainability goals.

What the Rethink Sustainability Index can do for your organisation:

- Capture the voice of your people**
 We've created the ability to capture feedback from teams and employees, to take their input as you embark upon or step up your sustainability journey.
- Powerful Visualised Dashboard**
 See how you score across each of the sustainable development goals. Set targets. Measure what makes a difference. Communicate progress across your organisation.
- Pinpoint where to improve**
 Our expert team can crunch your data, derive insights and help you determined actions to progress. The richness of our knowledge can generate insights, that lead to improving mindset, behaviours and ultimately better sustainable outcomes.
- Create or improve your sustainability roadmap**
 We can offer you a tailored service, to translate your insights into an overall sustainability roadmap, designed to uplift your index and to achieve the sustainability goals set by your organisation.

Category Distribution with Score

Category	Score	Target	Actual	Gap
Peace, Justice and Strong Institutions	82%	117	101	35

Responsible Consumption and Production	61%	35	53	61
Climate Action	54%	23	40	38
Life Below Water	51%	9	48	34
Partnerships For the Goals	48%	7	13	8
Life on Land	47%	19	23	47

ReThink Sustainability has developed the 'ReThink Sustainability Index' using the powerful Everperform playbooks. See: <https://everperform.com/rethink-sustainability-index> and <https://everperform.com/>

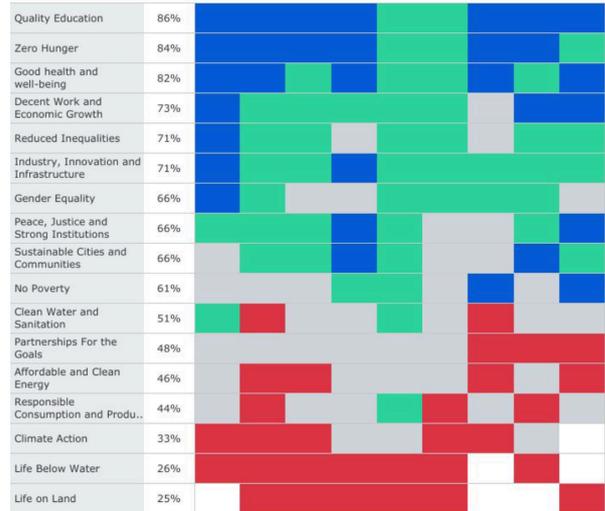

We have used the Everperform platform and integrated a new 'playbook' which understands and utilises the United Nations Sustainable Development Goals (SDGs), the 'Global Goals', to measure the performance of an organisations, its teams or employees in relation the SDGs.

We believe that use of the ReThink Sustainability Index is an ideal way for businesses and other organisations to engage with the SDGs by having their teams answer the questions delivered on the platform.

After an initial set of questions follow-up 'pulse' questions are sent on a daily, weekly or monthly basis. The questions will be both from our new SDGs playbook and Everperform's standard culture measurement playbook - all will be revealed!

The program will introduce the SDGs to team members and in turn provide an understanding of the levels of knowledge of sustainability, aspirations for sustainable operations and existing behaviours in the group. Individuals will be able to map their own performance against the team. Businesses will be able to compare their performance with other companies.
