

UCAPTURE

LIVE CARBON NEUTRAL

UCapture is a green-tech platform that's combating climate change by helping individuals and organisations reduce their carbon footprint – for free. It's a loyalty scheme based on carbon offsetting. We have the Australian agency for it. Use your **Chrome browser** and go to: www.ucapture.com/ReThink and create a login.

The process will put the UCapture extension into the browser. You'll see the companies that have signed up - more than 7500. You can buy airfares, hotels, groceries, track shoes, website urls etc. When you shop with the UCapture browser extension installed, UCapture's partner organisations pay a commission.

They use two-thirds of these commissions to fund accredited **carbon offset projects**, like reforestation.

Every time you purchase online a percentage of the purchase amount (3-20%) goes to UCapture. 33% of that goes to UCapture; 66% goes to the carbon offset project. There are some Aussie projects into that group now too.

You can also purchase carbon offsets directly from the **carbon offset projects** page.

There may be applications for other companies in your supply chain, customers, organisations you know, membership groups, etc.

Here's how UCapture works:

- We've formed marketing partnerships with **7,500+ online stores**.
- When users shop with our browser extension installed, our partners pay us commissions.
- We use two-thirds of these commissions to fund accredited **carbon offset projects**, like reforestation.
- Our extension also provides users with coupon codes, so they can save money too!

How we'll partner with you:

- we can set up a UCapture Program for your organisation (completely free). We will establish a **Referral Link for your Organization = www.ucapture.com/<yourname>**
- By getting your organization's members/followers enrolled to our platform through this link, their use of UCapture will generate carbon offsets, for free.
- This initiative comes at no cost to your organization to set-up or maintain, and will be low-cost / free to grow through simple online and in-person strategies.
- NB: for non-profit organisations we will **donate 15% of our net commission** (after carbon offsetting) to your organization to fund your own operations!
- Please check out this link and attached paper for a deeper introduction to how this works: www.ucapture.com/orgs
- See also: www.ucapture.com/business
